35	Thazavana Salome Raye	The Impact of Devised Theatre on Confidence and Teamwork on the performance among Grade IX Secondary School Students.
36	Tolia Kajol	A comprehensive study on the impact of Gaming on the Academic Performance of Grade 11th College Students

Action research empowers teachers to shift from passive implementers of curriculum to reflective practitioners who solve real classroom challenges using evidence-based solutions.

Core Benefits for Trainee & In-Service Teachers

Data-Driven Classroom Interventions: Teachers identify specific pedagogical issues—such as poor reading comprehension or low student engagement—and implement targeted solutions rather than relying on trial-and-error.

Continuous Reflective Practice: It establishes a habits-based framework where educators systematically evaluate their own teaching methods, leading to sustained professional self-improvement.

Immediate Contextual Application: Unlike theoretical academic research, action research addresses localized classroom dynamics directly, providing immediate solutions for unique student demographics.

Bridging Theory and Practice: It allows teachers to test educational theories in real-time, adapting abstract instructional methodologies into practical, workable classroom strategies.

Professional Agency & Autonomy: Engaging in systematic enquiry fosters professional confidence, giving teachers ownership over their curriculum design and classroom management.

Here is a completed report of an Action Research conducted by student-teachers of Batch 2024-2026 during their school internship/ practice teaching in the B.Ed. course. During a 4-week internship 36 students observed that they could decode reports for the same.
